INTEGRATED EDGE AI – POWERFUL & EFFICIENT

Meet our new **Edge Camera Module C7** with integrated NVIDIA® Jetson™ AI-supercomputer. C7 comes with the Jetson module pre-installed and pre-configured with our custom-built Linux OS for industrial applications. Everything is ready-to-use, giving you the freedom to focus on your vision solution – running powerfully and efficiently, directly on the compact device.

GET THE BEST OUT OF YOUR IMAGES

You cannot detect what you do not see. That's why we choose **Sony Pregius S** high-quality industrial image sensors. With high resolutions **up to 24 Megapixels** also large fields of view can be analysed. High frame rates and global shutter give you the best results even in dynamic processes.

LARGE & SUPERFAST STORAGE

Do not let storage limit your solution. Whether to store large amounts of data or for using complex neuronal networks, C7 offers you fast expandable storage options. Just pick the right choice out of **on-board NVME SSD** variations **up to 1 TB**.

C7 – 7 INTERFACES – EVERYTHING YOU NEED

Get ready to maximize capabilities in industrial vision solutions. Inspired by experts in logistics and production automation **versatile interfaces** are integrated in the device to create high functional turnkey-solutions and reducing system complexity at the same time.
